To reduce the deterioration of these routes, due to heavy usage, and potential risks to those using these byways, it is proposed to install gates restricting access. Pedestrians, cyclists and horse riders would still be able to use these routes at all times. This restriction is considered necessary to effectively manage the network and to safeguard future access.

Written objections (stating grounds and quoting ref. 1271) must be received by me by the **2nd March 2022**.
